

First in line

Take your packaging
line performance to
the **next level**

When you are successful. **We have succeeded.**

We want to be the world's number one in packaging line engineering.

That means we must be the best at optimising your productivity performance and sharpening your competitive edge. It's a win-win situation.

We offer a broad range of solutions: from line-integration to conveying, from feeding systems and tunnel machines to overwrapping, packing and palletising systems. All are built on five decades of expertise and the best-in-class technology that has made both Gebo and Cermex such trusted names.

Along with business and financial success, we want to be a people-centric organisation and impact positively on the lives of the people we work with and for.

Thanks to our unique portfolio and the depth and scope of our expertise, we are best suited to take your packaging line performance up to the next level and make you first in line.

Marc Aury
President & Managing Director

First in line is more
than a statement.
It is a commitment.

A commitment to stay at the forefront of the business and always deliver solutions and services of the highest quality.

To be a strong and ambitious partner and keep pushing the limits of technology, so we can create better results for you and your business.

This is not something we merely say. It is proven by our history. For fifty years, our engineers have created technologies and tools that optimise line performance in some of the most demanding industries.

So for companies who want to take their productivity to the next level, there can be no better partner: We are first in line.

Whatever your
business,
**we will make you
first in line.**

No matter your field, we have the expertise and solutions to solve your challenges.

We offer flexible lines that use resources efficiently. They encompass industries such as food and beverages, home care, personal care, dairy products and pharmaceuticals. In fact, you can be sure that whatever market you produce for, we have experience in the challenges you face and can provide you with the right solution for your needs.

Our lines ensure complete product integrity and meet all required safety standards, while also optimising uptime and productivity, expediting change-over times, reducing maintenance and your carbon footprint.

Gebo Cermex equipment such as conveyors, tunnel machines, packing, overwrapping and end of line equipment are designed to meet all potential challenges and our ability to adapt concepts across sectors has given us great results in these industries.

Whether primary or secondary packing, **we have the ideal handling solution.**

High quality standards, flexibility and innovation make all the difference in the packaging of your products.

Markets are changing constantly and the shape, size and packaging needs of products change with them. That is why we design our solutions based on a philosophy of versatility and which focus on giving you optimal flexibility through features like multiple speed levels and automatic changeovers.

Our ability to deliver this is due to two factors: we have evolved in keeping with changing markets, coupled with our firm commitment to cutting-edge research and development. This has allowed us to develop a product range that enables you to cost effectively and efficiently pack and promote your products.

We deliver high quality solutions for both primary and secondary packaging. From PET and glass bottles, cans, cartons, bags, pouches, tubes, aerosols, tins, jars to American cases (RSC cases), wrap around blanks, trays, shrink wrapped film, shelf-ready packaging, carton and film solutions, we are able to handle, convey, case pack, shrink-wrap or palletise your products, no matter their shape, nature or resistance.

When it comes to improving, **we never draw the line.**

A production and packaging line is only as efficient as its weakest link. Only an expert can make sure there are none.

The most important job in our business is creating value in yours. In this we are proven experts. We achieve it through four dimensions: equipment design, manufacturing, line engineering & performance, services. Offerings in our extensive technologies, tools and services portfolio include:

- Single contacts locally for complete integrated packaging solutions
- Best-in-class technology
- Greater efficiency
- Large primary and secondary packaging possibilities
- Faster deliveries thanks to increased customer proximity

Depending on your needs we can add substantial value to all, some or just one of the four dimensions. You can be assured that in each we are dedicated to enhancing your competitive edge.

We want you to be first in line.

Line engineering

Engineered for performance. **Made for you.**

We design your ideal line with emphasis on functionality, efficiency, ergonomics and productivity.

Each line has its own requirements in terms of buildings, utilities, processes and packaging. We make the effort to carefully understand how these work together harmoniously, so we can engineer a solution that meets your specific parameters, goals and challenges.

We can scale and sustain your performance, no matter the project scope, whether for quick interventions or greenfield projects, optimisation of existing installations or complete line-integration.

Our engineering capability materialises in a multidisciplinary unit of specialised experts, proven methods and procedures, and design and simulation tools custom made to ensure the best line productivity possible.

Plant and line design services:

- Engineering expertise from civil work, utilities, process and packaging
- Integration of independent outsourced equipment
- Material handling specialisation
- End-to-end project management
- Packaging line (incl. preliminary design, feasibility studies, simulation modelling, 3D animations, master plan, line transfer)

Born to deliver. **Built to last.**

Not only do we supply an exceptionally wide range of high quality equipment, we engineer it to perfectly match your parameters.

We supply best-in-class technology in production and packaging line equipment. In order to meet your needs, our standard solutions can be customised. Our portfolio comprises solutions for:

- Packing
- Overwrapping
- Palletising – Depalletising
- Crating – Decrating
- Conveying and cap feeding
- Pasteurisers, Washers, Dryers
- Intralogistics

All our equipment comes backed by our half a century of expertise and hands-on know-how delivering solutions that integrate smoothly into our customers' businesses, solving all of their material handling challenges.

Services

Our expertise makes you first in line. **Our services insure you stay there**

We provide services that can help you run your operations more smoothly and efficiently with maximum return on investment.

Your return on your investment in production assets depends on your ability to take them to the required level of performance and to keep them operating at that level, year after year. With our complete service product portfolio, we will help you maximise the performance of both stand-alone machines and complete, integrated packaging lines.

If you are happy with the way your assets are performing, our services include all the essentials needed to keep your equipment running perfectly: a highly reliable spare parts service, technical support which can be escalated to whatever level you require and the ability to rapidly adapt your production assets to ever changing needs.

Our service portfolio includes:

- Operator & Maintenance Trainings
- Spare parts
- Technical Assistance
- Line conversions & upgrades

That is how we keep you first in line.

Asset performance

Every production line can be improved. **But not everyone can do it.**

Whether your equipment was supplied by us or others, if you want to get more out of your assets, we can help you.

Applying the principle that it is impossible to improve anything that is not measured, our highly customisable Efficiency Improvement Tool (EIT) provides you with the means to monitor your asset's operating performance (O.E.E.) at whatever level of detail you require.

Our line performance audits provide you with detailed insights on every aspect of performance, from redesign opportunities to energy consumption, safety and the environment, maintenance strategies, operator training and material flows.

Our reliability services can assist you on a range of issues from the elimination of chronic losses through to the deployment of highly structured reliability programs.

- Measurement tools
- Performance Audits
- Performance & Reliability Services

Whether you have new challenges regarding capital investment requirements, capacity utilisation or operating expenses, our asset performance services are there to help.

We always
strive to reduce
our environmental
impact.

It's what keeps us
first in line.

In our world, maximising your efficiency also means minimising your carbon footprint.

Gebo Cermex is an eco-responsible company. We are a global player that delivers production solutions all over the world and we take an interest in and care about the world we live and work in.

Sustainability is one of today's fundamental business challenges globally and it is our responsibility to care for our planet and its people. That's why in every phase of your project from line engineering and equipment design to line audits focused on optimisation of energy consumption; we consider the impact of our solutions on the environment.

We are committed to optimising efficiency in order to reduce our use of resources and we continually challenge the limits of technology to make business more sustainability focused. Some of our major sites around the world have been awarded ISO 14001 certification for environmental management. Currently, we are evaluating the carbon footprints of our main sites to ascertain how we can make them even more efficient.

We are not just globally present. **We are locally strong.**

With more than 20 commercial and manufacturing sites in all major regions around the world, we have an in-depth understanding of local challenges.

So no matter where your business is situated, we can assist with anything from line engineering to conveying and automated packaging, from feeding systems, bottle washers and tunnel machines to overwrapping, packing and palletising systems.

We will help you optimise productivity and offer comprehensive after-sales services. You will receive unprecedented value to turn up the efficiency and productivity of your line.

With more than 37,000 installations all over the world, we have the experience and insight into local markets, local cultures and local infrastructure to ensure the success of your projects.

About Gebo Cermex

In a complex industry where know-how is everything, Gebo Cermex is formed from the union of two strong brands, Gebo & Cermex, gathering packaging line engineering experience across a range of market segments from beverages and food to pharmaceuticals, via home and personal care. For over half a century, our experts have improved the performance of production and packaging lines in some of the most demanding industries. Today more than 37,000 equipment and systems installations bear our signature.

We add value to our customers' businesses in four dimensions, from equipment design and manufacturing to line engineering, services and asset performance.

Headquartered in France, Gebo Cermex is a people-centric organisation with 1800 employees and over 20 commercial and manufacturing sites in all major regions of the world.

No one knows packaging lines like we do. We are first in line.
